

Managed Wi-Fi 6 / 7

Next-generation wireless for localized, fast connectivity.

SOLUTION BRIEF
Managed Wi-Fi

More devices, more applications, more demand—your Wi-Fi is under constant pressure to perform. Legacy networks can't keep up, and users feel it immediately. TDC delivers **Managed Wi-Fi** as a fully managed service, bringing the speed, efficiency and resilience modern environments require—without adding operational burden to your team.

The challenge behind traditional Wi-Fi deployments

- Designed for lowest denominator → **Poor performance during peak demand**
- Lack user segmentation → **Questionable network security**
- Focused on day one requirements → **Ongoing upgrade and investment burden**

Our expertise

Fully managed as if it were you

We manage the details with the focus you would, delivering a solution that drives business outcomes—not technical specs. Every decision is made as if we were accountable to your KPIs.

Integrated connectivity strategy

Wi-Fi is delivered as part of a broader mobile connectivity ecosystem—working alongside Passpoint, DAS or Private Networks when needed, and bundled with other digital infrastructure.

Built for scale and evolution

Flexible architecture that grows with your property, your tenants and your business—scaling securely and efficiently, with no need for a rebuild or constant access point upgrades.

No upfront investment

We replace unpredictable upfront costs and unnecessary surprises with a predictable monthly operating expense, including all maintenance and monitoring, which means no upfront investment from you.

Our solutions

Managed Services

Mobile Connectivity

- Distributed Antenna Systems (DAS)
- **Wi-Fi**
- Private Networks
- Signal Source as a Service (SSaaS)

Smart Building Solutions

- Fiber & IoT Networks
- Digital Infrastructure

Public Safety

What we deliver

Purpose-built network design

Wi-Fi engineered for your environment—not a one-size-fits-all deployment. We align coverage, capacity and performance to your building layout, user density and operational needs.

Secure, segmented access

Enable secure, unique experiences for your users and devices with proper network segmentation and the right policy controls in place.

Technology that grows with the applications

Supports the latest Wi-Fi standards (Wi-Fi 6/6E/7) for faster speeds, smoother performance and better handling of more devices at once.

Seamless user experience

Consistent, high-quality connectivity across all areas—supporting everything from guest access to critical business applications.

Passpoint with Wi-Fi

Enabling Passpoint during your Wi-Fi deployment is a cost-effective way to solve for cellular challenges, particularly for mid-market enterprise or commercial real estate, retail and hotels. Reach out to learn more.

Our core differentiators

	TDC	Other Wireless Providers	System Integrators	Equipment Providers	Wireless Carriers
Technology agnostic & neutral-host	✓	✓	✗	✗	✗
Custom solutions & business advisory	✓	✗	✗	✗	✗
