

What's your problem?

Have you ever had full bars on your phone, but you still can't place a call, watch a video or send a text? Do you have great service outside and lose it when you walk inside? Have you started deploying sensors to be more efficient, only to realize your network can't handle it? Over 80% of mobile traffic originates indoors and that number continues to rise.¹ As data demand increases, it can quickly overload your network. Here's what causes it, and how we can help.

My building: where connectivity goes to die.

My cell service is good outside, bad inside.

I have: Four bars of signal. Zero bars of hope.

Do you have all the "bars" but nothing works?

It's your bandwidth.

You know how your windows reject UV? They're rejecting the RF signal too.

I need emergency backup, because "oops" isn't in my vocabulary.

Failover, redundancy, 911 calls, first responders. Done and done.

COVERAGE

SAFETY

Unravel the chaos. We can help.

Network-As-A-Service

There are so many ways to address connectivity challenges. At TDC, we fund, develop and own in-building solutions like DAS and Private LTE. We tailor each solution to your needs, future plans, and budget, then manage it as a "service" for the long run. We handle the headaches so you stay focused on your business.

MANAGED SOLUTION

Are there partnerships or grants that can alleviate the burden?

How does "as-a-service" and \$0 upfront investment sound?

Would love to have a DAS, but my wallet just laughed at me.

PLTE, 5G, Wi-Fi, AR/VR, IoT, iDAS, BDA, BTS. Don't worry, it's as easy as ABC.

NEXT-GEN TECH

Wireless Carriers, Backhaul, Maintenance and Upgrades, OH MY.

SCALABILITY

I'm ready for cutting edge technology, not a sci-fi movie gone wrong.

My DAS is like a flip phone—but no one is excited for its comeback.

We can transition your aging DAS and get you a brand new one.

I need a solution that works now and has room to grow—skip the awkward teen years.

Our solutions are future-proof—ready for MIMO, C-Band, or whatever's next.

Ready to uncover your problem?

Let's partner
DealDesk@TillmanDC.com

Tillman Digital Cities (TDC) designs, installs, owns and maintains in-building connectivity solutions to solve today's challenges and plan for tomorrow's ambitions. As part of Tillman Global Holdings—which has deployed over \$10B in communications infrastructure in two dozen countries worldwide—connectivity is at our core. At TDC, we partner with Wireless Carriers, Service Partners and Enterprises to deliver custom, future-proof solutions backed by advanced technologies and a proven track record of excellence every step of the way.
