

No dropped calls, no missed care.

INDUSTRY BRIEF
Healthcare

Today's healthcare facilities are under pressure from every direction—mobile-first patients, staff demanding always-on access, growing IoT and medical device usage, tighter margins and rising compliance requirements. But one upgrade moves every needle: reliable mobile connectivity.

Clinicians depend on it for real-time EHR access and telemedicine. Nurses rely on it for mobile charting and medication management. When it fails, care slows, costs rise and scores fall. Connectivity is now the fourth utility. TDC designs, funds, builds, upgrades and operates **fully managed mobile connectivity solutions and bundled digital infrastructure with no upfront investment** that keep hospitals and campuses connected, compliant and performing—without disrupting care.

Our solutions

Managed Services

Mobile Connectivity

- Distributed Antenna Systems (DAS)
- Wi-Fi
- Private Networks

Smart Building Solutions

- Fiber & IoT Networks
- Digital Infrastructure

Public Safety

Benefits

Improved patient access & engagement

- Digital check-in, patient ID, mobile pay
- Seamless EHR integration across apps
- Personalized patient communication

Safety, security & compliance

- Secure access controls, smart surveillance
- Redundancy and back-up failover systems
- 911 and emergency services

More efficient operations

- Mobile clinician devices for care
- IoT-enabled medical equipment
- Connected registration desks, kiosks

Financial performance

- Data-driven patient analytics
- Optimized reimbursement capture (RCM) through connected documentation, real time mobile coding and payment on site

96%

of patients said mobile devices improved their experience.

61%

fewer medication errors when nurses used mobile devices.

31%

of hospitals reported lower cost per patient with mobile devices.

Why TDC for healthcare

Custom-fit solutions for clinical environments

Industry-specific solutions from engineering and design experts who specialize in hospitals and healthcare campuses, supporting high device density, complex floor layouts and mission-critical workflows.

A platform for everything digital.

TDC bundles mobile connectivity with digital infrastructure—digital signage across lobbies, waiting areas, clinical environments; surveillance across entrances, corridors, parking; smart sensors for access control, air quality, facility operations—all delivered under a single OpEx model with no upfront capital.

Easy button for healthcare connectivity

We take a complex process—across Wireless Carriers, design, construction, operations and lifecycle management—and simplify into 3–5 guided decisions without disrupting patients, clinical staff or operations.

No upfront investment. Clear terms.

We meet healthcare providers where they are—with commercial models aligned to capital planning, facility upgrades and clinical transformation timelines, including options to reduce risk and eliminate upfront investment. Clear contracts, no hidden fees. Straightforward guidance with outcomes aligned to patient experience and care delivery.

The business case for mobile

| | Illustrative Range | Considerations & Assumptions |
|---|--|--|
| Increases Patient Satisfaction | | |
| Top-box patient satisfaction | Assume 10% increase | Mobile check-in, mobile EHR, cellular-enabled telemetry, nurse on-call, mobile wayfinding, mobile payment |
| NPR (Net Patient Revenue) | Assume 1.4% decrease | 10% increase in top-box satisfaction = 1.4% increase in operating margin |
| Better Financial Health | | |
| Average length of stay | Assume 0.05-0.14-day reduction | Real-time care coordination through mobile device shortens length of stay |
| RCM (Revenue Cycle Management) | Assume 5% increase in real-time payments | Average 3% of NPR lost due to RCM issues |
| Energy Savings | | |
| Smart thermostats & lighting | Assume 5-20% savings | IoT-enabled building systems (HVAC, lighting, occupancy) deliver 10-20% energy savings in commercial buildings |

TDC is your dependable partner for fully managed mobile connectivity solutions, financed, deployed and supported by us. We ensure phones and devices work seamlessly to enable collaboration and experiences—so you can stay focused on your core business. As one of the fastest-growing mobile connectivity companies in the U.S. and a member of the Tillman Global Holdings family, we connect people, places and experiences, enhancing asset value and powering the next generation of buildings, businesses and technologies.
