

Public Safety

Code compliant, managed connectivity for first responders and safety.

SOLUTION BRIEF
Public Safety

Public Safety systems are only as strong as the networks behind them. From emergency response to daily operations, reliable, code-compliant mobile connectivity is critical to protecting people and property. TDC designs, deploys and operates fully **Managed Public Safety Solutions**—ensuring systems perform when it matters most.

The challenge behind traditional public safety deployments

Siloed systems	→	IT and operational complexity, no efficiencies
Compliance and approvals	→	Costly rework; risk delayed opening or shutdowns
Legacy commercial models	→	High upfront costs

Our expertise

Fully managed as if it were you

We manage the details with the focus you would, delivering a solution that drives business outcomes—not technical specs. Every decision is made as if we were accountable to your KPIs.

Integrated connectivity strategy

Public Safety systems can be deployed alongside mobile connectivity. Leveraging AHJ expertise, we work with local code to determine if shared infrastructure is feasible to drive efficiencies.

Experts in evolving requirements

We don't design just for today. Our managed service considers evolving Public Safety code requirements and local jurisdictions, so your solution evolves with them.

No upfront investment

We replace unpredictable upfront costs and unnecessary surprises with a predictable monthly operating expense, including all maintenance and monitoring, which means no upfront investment from you.

Our solutions

Managed Services

Mobile Connectivity

- Distributed Antenna Systems (DAS)
- Wi-Fi
- Private Networks
- Signal Source as a Service (SSaaS)

Smart Building Solutions

- Fiber & IoT Networks
- Digital Infrastructure

Public Safety

What we deliver

Reliable and compliant coverage

Ensure first responders have consistent, code-compliant communication throughout your property—meeting IFC and NFPA code requirements and guaranteeing coverage benchmarks.

Seamless integration

Public Safety networks work smoothly with your existing technology stack and complement Wi-Fi or DAS to optimize connectivity where it matters most.

Purpose-built, partner-agnostic

Our experts design a Public Safety solution tailored to your local jurisdiction and building requirements regardless of equipment provider, technology or architecture.

Designed at the device level

Continuous oversight to ensure systems are always operational and compliant. Dead zones can develop over time due to building changes, new materials or equipment aging, so continuous oversight is critical for compliance and safety.
